About Me

Driven Computer Science student passionate about technology, innovation and building solutions to real-world problems. Skilled in software development, data analytics, SQL and database technologies, and AI/ML, with hands-on experience delivering practical projects. Strong problem-solving mindset with the ability to analyse data, derive meaningful insights and turn complex challenges into efficient, user-focused solutions. Quick learner who actively explores emerging technologies, collaborates effectively and keeps growing as a technology professional.

Education

Vellore Institute of Technology, Amaravati, Andhra Pradesh 2024 - 2028
B.Tech in Computer Science & Engineering (Specialisation: Data Analytics)

Shivam Convent School Class XII

Don Bosco Academy, Patna Class X

Project Work

AgentGuard React, Node.js, Express, PostgreSQL, Prisma, Redis, Socket.io

- Developed a runtime security and monitoring platform for AI agents that evaluates external actions using policy enforcement, risk scoring and ALLOW / BLOCK / REVIEW workflows, with audit logging and real-time monitoring.
- Implemented secure Gmail and multi-payment execution pipelines using a modular executor/adapter architecture with authorisation, validation and idempotent processing.

Supply Chain Data Analytics Python, SQL, Pandas, NumPy, Scikit-learn, Streamlit

- Built an end-to-end supply-chain analytics and prediction platform covering ETL, EDA, supplier/route/warehouse analysis, financial impact assessment and shipment-delay prediction using Logistic Regression.
- Developed an interactive Streamlit dashboard with ML evaluation, feature-importance analysis and actionable operational insights.

AgriScan Python, AI/ML, Computer Vision

- Developed an AI-powered agricultural image-classification system with image preprocessing, model training, validation and performance evaluation.
- Extended the application with a map-based store locator that finds relevant stores within configurable 5, 10 and 25 km radius ranges from a selected location.

Experience & Activities

- **Team Leader, Smart India Hackathon:** Led the team that qualified the first round of the national-level competition.
- **Hackathons:** Participated in university and national-level hackathons, building and demoing working prototypes under strict time constraints.
- **Software Development:** Developed software solutions focused on enhancing user experience.
- **Team Leadership:** Led team projects, strengthening collaboration and project management skills.
- **Peer Tutoring:** Tutored peers, building communication and leadership abilities.
- **Technical Presentations:** Presented projects at tech fairs and university expos, boosting visibility and professional networking.

Technical Skills

Languages: Python, Java, JavaScript, SQL
Web Development: React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS
Databases: PostgreSQL, MongoDB, Prisma, Redis
Data & ML: Pandas, NumPy, Scikit-learn, Streamlit, Power BI, Microsoft Excel
Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP)

Certifications

Completed: Hedra Certified Developer Associate (HCDA); Hedra Certified Foundation (HCF)
In Progress: Full Stack Web Development, DSA in Java (Apna College); Data Analytics (Udemy)
